The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate or render obvious a CT system, where only one filter of the plurality of filters to be positioned between the energy source and the subject when the energy source is energized to one of the energy states. The prior art of record also does not teach positioning only a first portion of the filtering apparatus or a second portion of the filtering apparatus is between the subject and the electromagnetic source and single projection paths for both filters. McDaniel et al. teach the placement of both filters between the x-ray source and the detectors with separate projection paths in which the pairs of filters are positioned. Upon allowance of generic claims 1, 8, and 19, non-elected claims 6, 7, 14, 15, and 23 have been rejoined.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892 for relevant references of interest.

5,771,269 – apparatus and method for removing scatter from an x-ray image

5,430,787 – apparatus and method for Compton scattering tomography
